

## Environmental Policy

A & B Welding are committed to protecting the Environment through the implementation and utilisation of an Environmental Management System aimed at controlling operations, processes, products and services that may give rise to significant Environmental Impacts.

### Our key objectives are to ensure that we:-

- Prevent Pollution and Damage to the Environment
- Comply with the Environment Protection Regulations
- Evaluate our Environmental Compliance by Conducting Internal Audits and Inspections
- Eliminate, Minimise or Recycle Packaging
- Promote Environmental Awareness to all Employees, Contractors and Visitors
- Strive for Continual Improvement.

This policy is applicable to A & B Welding in all its operations in the manufacture and welding of piping systems and structural components for various Industries including the Petro Chemical, Power Generation and the Oil and Gas Industries.
